Pecos River Trip in Planning Stage

Randy Hohlaus wants to put together a Pecos River trip next March. Come to the August meeting where we will discuss particulars.

-o0o-

Status of Goliad Canoe Trail

The Canoe Trail Goliad Committee is continuing to work. Currently, design concepts for six access sites are being developed and are expected to be completed in the fall of 2004, with an expected construction start in 2006. In the meantime, the committee continues to raise public awareness of and support for the project, including raising grant matching funds.

To this end, the committee is selling raffle tickets for an Old Town Canoe and paddles, PFDs, a car-top carrier, and other canoe supplies donated by Academy Sports and Outdoors. The cost of each raffle is \$10.

If members of your organization are interested in helping this project by purchasing raffle tickets, please contact me with the number of tickets to mail and a mailing address. order your tickets by contacting the following Canoe Trail Goliad Committee Members:

Leah Huth at (361) 645-3405 or at Leah.Huth@tpwd.state.tx.us or
Claire Barnhart at (361) 375-2824 or at clairebarnhart@yahoo.com.

More information about the project and the raffle may be accessed at
<http://www.goliadcc.org/events/canoe.htm>.

Rivermen who were not on the club trip to Goliad in connection with the trail can read Randy Hohlaus's report of the trip here:

<http://www.alamocityrivermen.org/goliad.htm>

Upcoming Events

August 11, 2004	Monthly Meeting	Barbeque Station, 1612 N.E. Loop 410, near Harry Wurzbach, 6:30 to 8:00 P.M.
September 4-6, 2004	Labor Day Trip, Junction, Morgan's Shady Park	Kathy Cusick
September 8, 2004	Monthly Meeting	Barbeque Station, 1612 N.E. Loop 410, near Harry Wurzbach, 6:30 to 8:00 P.M.
September 11, 2004	Bird Island Basin, Padre Island	Gary Tupa, gtupa@swbell.net
October 13, 2004	Monthly Meeting	Barbeque Station, 1612 N.E. Loop 410, near Harry Wurzbach, 6:30 to 8:00 P.M.
November 10, 2004	Monthly Meeting	Barbeque Station, 1612 N.E. Loop 410, near Harry Wurzbach, 6:30 to 8:00 P.M.

March 2005	Pecos Trip	Randy Hohlaus, hohlaus@prodigy.net 493-7058

Mustang Island Beach Camping/surfing On a Full Moon Weekend August 28-29

The Mustang Island Trip has been rescheduled for a full moon weekend. The new date will be August 28-29, with arrival Fri evening 8/27 for those who would like. For those of you who did not make this trip last year, Kevin and I take all of our 6 SOT kayaks (2 ww, 3 recreational and 1 tandem) so that members can try out surfing at the beach. We camp on the beach, set up tarps for shade off of our camper/trailer and other available truck racks, and cook most meals together. This location is a state park and has water faucets/cold showers right on the beach as well as portable potties, so is a comfortable campsite. There are also shower houses available at the entrance to the park.

If you are interested call Kathy Cusick at 830-885-5324, or e-mail at kmcusick@juno.com.

-o0o-

Corpus Christi Paddlefest 2004

You are cordially invited to join the Corpus Christi Kayakers for 3 days of kayak touring, instruction, and camaraderie. Mark the dates down: October 9, 10, and 11. (Sat, Sun, and Columbus Day Monday). We are currently in the final planning stages and would like your input on which tours and lessons you would like to try. We need a general idea of your interests so that we can make sure that we have enough trip leaders and instructors to offer what our attendees really want.

You will find our preliminary schedule of events, descriptions of the various tours we are currently planning, and an interest questionnaire for you to fill in at our website: <http://home.earthlink.net/~hkwphkw>

If you think you might attend please fill out the interest questionnaire and submit it. There are no entry fees and this questionnaire will indicate your interests and will not require any definite commitments on your behalf at this time. If you would like to volunteer to lead or assist with a trip or instruction, there are places on the questionnaire to let us know. Again we are not asking for a definite commitment to lead or teach at this time, we just want to see who might be available.

Around the first week in Aug, we will finalize our schedule and post an Entry Form on the web site so that people can reserve their space in the various trips and lessons. Just prior to posting the Entry Form we will be confirming our volunteer leaders and instructors.

We look forward to having you join us for an instructive and fun kayaking event.

Mark J. Arnold, mjamja@earthlink.net

2004 Carolina Canoe Club's "Week of Rivers" Trip Report

By Kathy Cusick and Kevin Longin

We left San Antonio Thursday evening, July 1st, in our truck and self-contained camper, and drove straight through to Smokey Mountain Meadows Campground in NC near Bryson City where the Carolina Canoe Club sponsors the "Week of Rivers" (for great information on the campground go to: <http://smmcamp.tripod.com/> and www.carolinacanoecub.com for the Carolina Canoe Club). The Carolina Canoe Club has a membership of greater than 700 and I would estimate at least 150 of them were at the Week of Rivers event. There were a significant number of paddlers who came from Texas, mostly Austin and Houston (I can easily think of 10 that were there, and I'm sure there were several more).

We arrived on Friday evening (after our 19-20hrs drive) and removed the boat trailer (with our 6 boats) and our camper from the truck to give us more mobility to go to put ins and take-outs.

We had reserved an RV site with full hook-ups, but there were also a wide variety of other options available. Most people chose to camp in the open field near the group tent ("circus" like tent in the picture), but there were a fair number who chose to rent cabins, or stay in nearby hotels.

The fun part of the event really began for us on Saturday morning, when the Week of Rivers quickly becomes a way of life that revolves around talking about river levels, weather reports, paddling, and spending time with old friends and new acquaintances.

Since, most of the rivers back east run with a combination of dam release, and natural water flow that can't be completely determined until that particular day, there are morning meetings each day in the large group tent where this information was posted and discussed. Following which, local club members decided who would lead trips to which rivers that day. Once the trips have been decided on and each member has located the group that they feel that they are best suited for based on their own paddling skills and the water conditions, plans are made to round up and head out to the put ins.

Not only is the paddling some of the best in the country, there are also many side activities available. Always a favorite is shopping at Nantahala Outdoor Center (NOC), a great store for all types of boats and boating supplies. In the evenings at camp there are presentations from NOC, or other outfitters, video presentations of "carnage" from previous trips that members have made through very challenging white water. When not in use for presentations, you are free to use the TV and VCR to play videos that have been collected by members over the years, which include: training, and general river running videos. There are often clinics for the canoers

and/or kayakers put on by expert or professional boaters. I would also consider Joe Griener “Kinder-Gentler Ocoee” trip to be a type of clinic, and we are looking forward to taking part in this trip/clinic next year.

There were even folks offering massages (for a small fee) at the end of the paddling day.

Every year we come away as significantly better paddlers after this event. Last year the rivers looked fairly difficult, with many very large waves in the rapids. But, this year, even with a comparable water level, all the rapids looked smaller and were much easier to manage.

7-3-04 (Saturday) **Big Pigeon River - Upper Section,**

Level: 3000-3300csf (high... very, very, high; American Whitewater’s max suggested level is 2500cfs) Class III-IV+ Trip Leaders: Chuck and Chuck. Kevin and Kathy in Dagger Impulse white water canoes.

Extraordinary scenery surrounds the Big Pigeon River, as it is skirted by the Great Smoky Mountain National Park and the Pisgah National Forest. The Pigeon is made up of the Upper and Lower sections, and boasts twelve class III and three class IV whitewater rapids. The Upper stretch is five miles long and runs from the Waterville Dam to Hartford Tennessee. The Upper is the more challenging of the two sections, with several Class III rapids and a couple of Class IV drops. The most notable rapids for us were Powerhouse, Hawaii Five-O, Accelerator (It is a 25 yard stretch which loses 12-15 feet of elevation), Double Reactionary, and Lost Guide. Other rapids include: Roller Coaster, Big Rock, Too Late, Vegamatic, Razor Blade, Super Glue (Kathy swam Super Glue, just making it into the eddy before going over Accelerator), After Shave, and “Last One?”.

We started the day with a relatively large group, ~20 people. Several in the group opted to paddle elsewhere after looking at the river level. We split those that remained into two groups, those that wanted to run more aggressive lines and those that preferred to be a little more conservative. We chose to paddle with the more conservative group. Never the less, we both swam 3-4 times. Kevin’s “best” swim was due to a bad line through Lost Guide rapid, which caused him to be jettisoned several feet (with significant force) into a nearby eddy. Somewhat surprised by his good fortune at arriving without a swim and unhurt, all that was required of Kevin was to climb back into his relatively dry boat. Other swims required significantly more effort, and sometimes were of a rather long distance due to the swift water and lack of eddies. The culmination of the day was at Accelerator, which we both were able to navigate effectively (The line starts right of center, moving right-to-left following the green tongue, skirting the Class IV President’s Hole at the bottom). Best of all we were also able to survive the subsequent, extremely large wave train, Last One?, without being totally swamped. Even with the epic swims, we enjoyed our day on the river, and look forward to being able to run the Upper Pigeon again.

7-4-04 (Sunday) Cartecay Section II 10miles, Level: 2.75ft (higher level than average, but perfect for paddling) Class I-II++ Kevin, Kathy (Canoes), Our daughter and her boy friend, Heather and Colby, drove over from Nashville, TN to join us for the next several days. We put them on whitewater Sit On Tops (SOTs) since these don’t require a roll in order to recover from a spill: +10 or more other paddlers in various types of boats (Trip Leader: Susan Eda (Houston, TX))

The Cartecay River is nestled on the banks of the river in the beautiful North Georgia Mountains. It is perfect for novice and intermediate paddlers to hone their whitewater maneuvering skills as you meandering through hill country and lovely residential areas near Ellijay, GA. The Cartecay’s natural progression from flat-water to Class III rapids, with plenty of play spots in between, makes it a great beginner-novice river. There

are moderately technical rapids, characterized by Class II water and highlighted by three sizeable rapids and small-medium drops, but all drops can be easily portaged. (First Fall, Clear Creek Falls, Blackberry Falls (the Class II + grand finale slide)). Most of the group took out at the midway point, but we continued on with Cleo in the lead to the 2nd take out. The extra paddling was well worth it as it allowed us to experience several very fun rapids that we would have otherwise missed.

French Broad Section X, Asheville, NC area (Newport 3140cfs-Ashville 2190cfs)

Kevin, Kathy (Canoes), Heather, Colby (SOTs): and about 20 or more other paddlers (Trip Leader: Susan Eda)

This section, through which the French Broad flows, is gentle, but there were several fast moving shoals, sharp river bends all in a beautiful natural river valley environment. The river is very wide with little protection from the sun offered (bring sun screen and lots of water).

We plan on doing the more challenging whitewater runs on the French Broad, Section Eight and Nine next year.

7-6-04 Chattooga Section IV, GA Class III-V 1.7ft (medium for rafting), 7 miles of free flowing river (i.e. not dam controlled)
Nantahala Outdoor Center (NOC) guided raft trip with Charlie Laws as our guide (Charlie is a Houston, TX paddler, who now works for NOC). 5 person boat: Kevin, Kathy, Heather, and Colby.

This section is seven miles long and runs from US 76 to Lake Tugaloo. Section IV has extremely challenging whitewater in some of the wildest and most inaccessible canyons in the southeast. The river drops nearly 50 feet per mile over numerous ledges and falls as it cascades between towering cliffs, spectacular rock formations, and beautiful waterfalls.

The first half of Section IV consists of a number of "warm-up" rapids: Surfing, Screaming Left Turn, and Rock Jumble. After Woodall Shoals and the thrilling Seven Foot Falls, the Five Falls run is challenging, with five technical Class IV-V rapids. Scouting the 5 falls from shore with rescue lines in place prior to running the rapids was a requirement. Often two guides would control the raft through the rapid one in front and one in back. The rapids are called First Falls, Corkscrew, Crack in the Rock, Jawbone, and Sock-Em-Dog—in quick succession. Below the Five Falls, only Class III Shoulder Bone rapids remain before the calm of Lake Tugaloo where we rafted up to a power boat for the 2 mile tow back to the take out.

Chattooga Section III ½, GA 8 miles Class III-IV 1.75ft (perfect for canoeing)

Charlie Laws guided trip (Kayak); Kevin, Kathy, Steve and Pam Rogers in canoes; Heather, Colby on SOTs

After rafting Section IV of the Chattooga at a level of 1.7ft, we decided that this river wasn't quite as intimidating as it is generally made out to be (i.e. almost guaranteed death at every turn. Although, without good boat handling skills, or during high water conditions, or lack of good luck, it very well could be). So we decided that with the expert guidance of Charlie Laws, and a relatively benign water level, we should give the "kinder-gentler" Section III ½ a try. We put in at Thrift's Ferry, and took out just below Woodall Shoals. The first major rapid after Thrift's Ferry, is Bull Sluice a Class IV rapid. On river right the line is through Double Drop (the "bull") followed by the sluice, dodging Decapitation Rock in the middle of the river. This is the more difficult run with higher consequences for mistakes. Those that decided to run the rapid chose the line on river left called the Virginia Slide, or Single Drop. Charlie, Kevin, Kathy, and Steve all had good runs. Charlie and Steve had the cleanest runs, followed by Kathy, with Kevin being off line to river right giving a very fun boof off of "Decap Rock". The subsequent rapids were all quite fun. The day culminated with the run through Woodall Shoals. Again, everyone who decided to run the rapid made it successfully. Charlie, and Kathy had great lines on river right of the Class VI hole, while Kevin landed in the middle of the hole. The grabby hole tried to pulled Kevin in several times as he worked hard to paddle out. Barely making it out, he

just avoided being badly recirculated (are we seeing a trend here). Steve had a fun ride through the sneak on far river right.

This was a great day and we look

forward to being able to visit section III ½ again next year. We will probably work on our skills quite a bit more before attempting the more challenging Section IV in Canoes or Kayaks.

7-8-04 Nantahala, Near Bryson City, NC; 8 miles Class II-III

Charlie Laws guided trip (Kevlar Outrage); Kevin, Kathy, Steve Rogers in canoes; Heather, Colby on SOTs

The Indian word *Nantahala* means "land of the noonday sun," and aptly describes the steep-sided Nantahala Gorge as the sun doesn't get a chance to burn off the fairly consistent fog created by the warm moist air condensing over the almost icy water until later in the day. This makes a perfect habitat for lush groves of rhododendron (some of which were still in bloom), and mountain laurel.

The eight-mile run of constant waves and swift currents create what are basically Class II rapids (19 of them) with Class III Nantahala Falls waiting at the end. Starting out in Patton's Run (class II+) is always an adventure, and often a shock as the very cold bottom release dam water hits. Kevin and Steve had nice runs on Nantahala Falls. Heather did a great rock splat (as taught by Charlie the previous day on the Chattooga) followed by a roll over as Colby bumped into her. She was rescued by a group in a raft, and Kevin and Colby rescued her boat. Kathy had what appeared to be a good line until she side slipped into the hole at the bottom a was window-shaded. Good video of these runs was captured.

7-9-04 Tuckasegee, Western NC near Bryson City; 5miles Class I-II

Although the Tuckasegee is a rather tame river it was still a very enjoyable way to test out our tandem abilities in our newly outfitted Mad River Synergy. The Tuckasegee River offers an enjoyable alternative to the Nantahala being less crowded, and warmer than the bottom release dam fed river. This is the perfect river for beginners and those needing a rest from more rigorous paddling, and is also only a short drive from the campground and a short shuttle for the run. It made for a very relaxing last day of paddling back East.

SwiftWater Rescue Course: Aug 14-15, 2004

Want to learn the latest techniques in SwiftWater Rescue for paddlers? Come and join Jim Simmons and Tom Jenkins, both ACA SwiftWater Rescue Instructors, as they are offering an ACA 2-Day SwiftWater Rescue course --

Dates: August 14-15. The course will be on the Lower Mountain Fork River, near Broken Bow, Ok. The class will be limited to about 10 participants, so the student/teacher ratio will be great!

DESCRIPTION--The 2-day workshop is intended for intermediate and up whitewater paddlers in kayak, canoe, raft, or other inflatable, who are capable of performing river maneuvers in class II whitewater and beyond. The course consists of classroom sessions, land-based drills and hands-on practice in various river skills. Participants should be in good health and physical condition, with good swimming ability because extended periods of practice time are spent in the water. Each paddler should be comfortable being in and swimming in the river current. The workshop emphasizes strategies and proven rescue techniques for minimizing risks encountered in whitewater boating. Some of the main topics include:

- 1: Practice swimming drills and self-rescue, wading, throw rope management, boat based and other assists,
- 2: Rescue scene organization,

3: Techniques for entrapment and pins,

4: Drills with the specialized rescue PFD, and

5: Introduction to the basics of knots, anchors, haul systems and other techniques. Highlight of the workshop will be the rescue simulations and "putting it all together" in team scenarios. A participant's signed agreement to the ACA Waiver/Release of Liability will be a condition of enrollment in the workshop.

Cost: \$125.00 per applicant (plus \$6.00 if not an ACA member) Camping, lodging and meals are not included. For further details or to apply for either workshop, contact Tom Jenkins "ASAP": e-mail: paddling@att.net phone: 903-639-1409.

Complete course description and equipment requirements will be sent upon request for an application.
Tom Jenkins, Coyote Canoeing, <http://paddling.home.att.net>

-o0o-

New Rules for Hidalgo Falls

As most of you know, on August 1, the lock combination at TRPA's Park at Hidalgo Falls will be changed. Of the 267 people who are currently certified to access the property, only those who fall into one or more of the following categories will be given the new combination (either by email or phone): (a) lifetime Hidalgo members--those who have donated \$500 or more overall to the Hidalgo effort (32 people), (b) current TRPA Protector (\$25/yr) or higher members, (c) paddlers who have contributed a certified five hours of work this year to cleaning up and maintaining the property (15), and (d) club-designated Hidalgo Falls members.

This last category will vary from club to club, but here is the basic plan (worked out in consultation primarily with Bryan Jackson of the Dallas Downriver Club): Like individuals, clubs will be given HF lock privileges (the gate combination) for members in two forms. If a club has donated more than \$500 specifically for Hidalgo Falls, it will be given lifetime lock privileges for a number of members in multiples of \$500. The club would designate members annually as their HF-authorized users. Clubs can also qualify members for annual certification by donating a certain amount earmarked for Hidalgo to TRPA, and those funds would be counted in multiples of \$25 (the TRPA Protector rate) to determine the number of people in the club who would get the combination for that year (beginning August 1).

For example, if a club donates \$500 this year specifically earmarked for Hidalgo, it would make 20 of its members eligible for getting the combination. The club would determine who those people are, and they would be certified after having completed the orientation that everyone has to go through anyway (e.g., getting familiar with the gate situation, property boundaries, regulations regarding who gets in, etc.). We think we can package the orientation into something that can be done on-line or at a meeting of the club. The list of names of club-certified users for that year would be sent to Tom Goynes and me so that we have a record. If a member of a club wants to become a lifetime member, he or she can donate \$500 or more to support TRPA's efforts at Hidalgo Falls, and that would free up a slot (if that person had been designated as one of the yearly users) for someone else in the club.

Grandfathering: Some clubs donated large sums (in some cases, thousands of dollars) to purchase the property over the past three years, and we want to make sure their members have access to the property, especially during this first year of our new policy. So we would like clubs to send us a list of its members authorized as club-designated users of the property. If a club has donated a lot, it can identify a bunch of people as HF users. (Note the intentionally vague use of "bunch.") Clubs that have donated less to HF should limit the list this year to what it considers fair and equitable.

Bottom line: any paddler who wants to access the river at TRPA's Park at Hidalgo Falls can use the property without having contributed any money or work or belonging to any club as long as he or she goes with someone who has contributed money or work or who is designated as a club-authorized user. If someone wants the combination to the lock, he or she must have donated (either directly as an individual or through his or her club) or helped maintain the property through labor. We have found that those who have donated money or labor to the project are much more likely to take pride in the place than those who have not.

Steve Daniel

Basic River Kayaking Course

The Spring Woods Canoe Group Basic River Kayaking course basic information for the weekend of October 2-3, 2004. This is a 2 day class that gives a great basis for kayaking, including river reading, safety and self rescue. The class begins with a video night that we will schedule in San Antonio once we have interested folks registered. Saturday we will paddle the Upper Guadalupe River, and Sunday we will paddle the San Marcos River. You will get wet during the safety and rescue portion of this class. Susan will need to know what your boat needs are and size of PFD, as well as having the required forms completed. Cost is \$100 and includes boat/paddle/pfd for 2 days of instruction.

Pre-Class Video Night 6:30-9:00 pm (meeting place TBD)

Please bring a copy of your Class I medical form to the meeting. We will need it for the duration of the class; then you may have it back. We may be taking out at Guadalupe State Park, so bring your park pass if you have one.

Friday Evening or Saturday Morning

We will be meeting at Pecan Park Retreat in Martindale to camp. If you will be setting up camp in the dark, be sure and bring a flashlight. See the attachment giving the directions to and the map of Pecan Park. You may also drive to class each morning if you wish, but please let us know what you plan to do.

Saturday - leave for breakfast at 7:15 am

From breakfast we will drive to the Upper Guadalupe River.

Wear your paddling clothes and bring your lunch, snacks, water, rain gear, dry clothes, shower items, a towel, dry shoes, and a plastic bag for your wet clothes. We will clean up at the park before we return to the campground. We will have dry bags for your lunches and wallets. It will be after 8 pm before we return to camp.

Sunday - Leave for breakfast at 7:15 am

Wear your paddling clothes to breakfast. We will eat and return to camp where we will launch our canoes for today's trip down the San Marcos River. Pack your rain gear and lunch and water for the river trip. We will get off the river around 3:30 pm, and drive back to Martindale to break camp.

Any questions, call or email Susan Eda. My cell phone number is 713-203-2452.
